

SECURITY ASSET MANAGERS (SAMs™)

HIGHEST SECURITY ASSET CONTROL

Key Systems, Inc. offers several styles of electronically controlled cabinets to store, audit and manage your keys and assets. You can personalize these devices to secure a wide variety of sensitive items. However, keys remain our customer's main focus for asset retention. The two most widely utilized methods for storing keys are through direct entrapment and/or Tamper-Proof Key Rings®. Access is assigned to one or more users based on configuration through GFMS™ Software. PIN access is standard and a host of other access options are available.

Direct Entrapment

Key Systems Inc.'s Security Asset Manager (SAM™) utilizes a variety of methods to secure your assets. To achieve the greatest level

of security for high sensitivity keys, we offer direct entrapment in dedicated key positions.

Your master keys are locked in place concealing their profile and providing absolute protection from tampering.

Interchangeable Cores

To achieve direct entrapment, your interchangeable cores may be installed within our position housings.

This allows for a custom placement of locks and convenient rekeying should the need arise.

Interchangeable core housing options are available for Small Format, Large Format and Mogul style keyways.

Custom Cylinder Mounting

Key Systems, Inc. provides flexible engineering options to house your locks regardless of shape or size.
